K11	 	①	array	*	a:for	page data	none	none	TikTok (1.57.0)	[2]

We have corrected the discrepancy in the reported results, with all modified table entries highlighted in red. In particular, we now explicitly distinguish between partially fixed cases (denoted as ) and fully fixed cases (denoted as 13

Table 3: Zero-day logic discrepancies in cross-layer communications of WeChat.
